CALL FOR PAPERS

2003 National Workshop of the Economics and Environment Network (EEN)

Friday 2 - Saturday 3 May 2003, Canberra, ACT

The inaugural national workshop of the Economics and Environment Network (http://een.anu.edu.au/) of the Australian National University is open to anyone interested in promoting research, learning and better policy in environmental, resource and ecological economics within Australia, and in the profession at large.

The national workshop will include papers (in a single session, each with a discussant), a policy forum, and plenty of time for dialogue on frontier issues in environmental, resource and ecological economics. Papers will be selected "blind" by a Program Committee comprising Professor Jeff Bennett (ANU, Associate Editor, Australian Journal of Agricultural and Resource Economics and Member of the Editorial Board, Australian Journal of Environmental Management), Dr Richard Damania (University of Adelaide and Editor, Australian Economic Papers), Dr Tom Kompas (ANU and ABARE), Dr John Mullen (NSW Agriculture and Editor, Australian Journal of Agricultural and Resource Economics) and Dr Jack Pezzey (ANU). Our expectation is that presenting authors will have their within-Australia and cross-Tasman travel expenses and their Canberra accommodation expenses paid for by the Economics and Environment Network.

If you wish to present a paper at the national workshop, please send a full draft of your paper in electronic form (Word or PDF documents only), including a minimum 250-word abstract on the title page, but with no name or contact details in the paper, to the Coordinator of the Organising Committee no later than Friday, March 14, 2003. Please include your contact details and other information in a separate e-mail for each paper submitted, in the following order: (1) title of paper, (2) all authors' names with contact author underlined; (3) mailing address; (4) telephone number; (5) fax number; (6) e-mail address; (7) URL (if available).

Coordinator of the Organising Committee:
Dr. R. Quentin Grafton, Centre for Resource and Environmental Studies (CRES)
The Australian National University, Canberra, ACT 0200, Australia
Phone: (02)-6125-0663, Fax: (02)-6125-0757, E-mail: qgrafton@cres.anu.edu.au
